**Notice to the shareholders of the
Pictet – Emerging Local Currency Debt compartment (the “Compartment”)**

Luxembourg, 6 February 2013

Dear Shareholder,

We wish to inform you that the Board of Directors of Pictet (the “Company”) has decided to increase the maximum rate of anti-dilution measures applicable to the Compartment in order to protect the interests of existing shareholders.

In accordance with the provisions in the section “Calculation of the net asset value” of the Company’s prospectus, the Board of Directors is authorised, at the time of subscriptions and/or redemptions received for a given net asset value calculation day, to make the entering or existing shareholders bear the negative impacts of portfolio movements.

From 7 March 2013, the effect of these corrections of the net asset value will increase from a maximum of 2% to a maximum of 3%.

This decision is motivated by the nature of the Compartment’s investments. Since the Compartment is mainly exposed to the local currencies of the emerging countries, especially the Brazilian real, it has to cover significant rebalancing costs at the time of subscriptions and redemptions, in particular the Brazilian IOF tax.

We remind you that the anti-dilution measures described above are not fees paid to the management company or to other intermediaries, but an amount that will be credited to the compartment and/or class in question.

Due to these changes, you may request redemption of your shares, free of charge, up to the net asset value calculated on 6 March 2013.

The new Pictet prospectus dated 7 March 2013 will be available from the Company’s registered office on request.

Yours faithfully,

For the Board of Directors,

Marie-Claude Lange
Director

Pascal Chauvaux
Director
