The Sub-Fund's aims to invest in issuers considered to be the "pillars" or "leaders" in the global economy, wherever their geographical location. The Investment Manager seeks to benefit from new structural trends across the globe by taking positions in issuers that benefit from "secular" growth rather than cyclical growth and issuers poised for gains regardless of the economic climate.

The Investment Manager sets out to identify companies that boast a clear competitive edge, stable of growing market share and a time-tested business model. From July 27th, 2015, the Sub-Fund's investment policy will also be amended as follows:

"The Sub-Fund's strategy qualifies as Long/Short equity and its investment strategy relies on fundamental financial analysis. It invests in equities issued in Europe (EEA plus Switzerland). The global risk associated with investments of the Sub-Fund (Longs and Shorts) cannot exceed 200% of the net assets of the Sub-Fund. With a net exposure limited to +/- 20% of the assets under management, it is not significantly dependent on the equity market trends and the performance depends essentially on the capacity of the Investment Manager to take the right decisions as to the long positions (purchase of a share to benefit from its upside potential) and synthetic short position (sale of a share through CFD or DPS to benefit from its downside potential).

More precisely, the Long/Short strategy allows:

- *to take long positions (purchase of a share) on equity markets when the management team considers that the issuers are undervalued,*

- to take short synthetic positions (mainly through the sale of equity CFD or DPS), when it considers that the issuers are overvalued. The Sub-Fund may also take short synthetic positions through the sale of futures on indices and futures on sectors (directly or through DPS)

The Sub-Fund may at any time invest in:

- Equities issued in Europe (EEA plus Switzerland) or equivalent financial instruments (such as ETF, futures, CFD and/or DPS, etc.): from 0 to 100% of its net assets,
- Equities issued out of EEA plus Switzerland: up to 5% of its net assets
- Equities with total market capitalisation below 150 million Euros: up to 5% of its net assets,
- Euro zone Ordinary Bonds, convertibles bonds or equivalent: from 0% to 100% of its net assets,
- Money market instruments or deposits, from 0 to 100% of its net assets,
- Other financial instruments: up to 10% of its net assets."

(xii) DNCA INVEST – MIURI

From July 27th, 2015, the Sub-Fund's investment strategy will be read as follows:

"The Sub-Fund's strategy qualifies as absolute return equity and such strategy relies on fundamental financial analysis. It invests in equities issued by European issuers (EEA plus Switzerland). The global risk associated with investments of the Sub-Fund (Longs and Shorts) cannot exceed 200% of the net assets of the Sub-Fund. With a net exposure limited to +/- 30% of the assets under management, it is not significantly dependent on the equity market trends and the performance depends essentially on the Investment Manager's capacity in identifying equities that have the characteristics to outperform their market indexes or their sector indexes.

More precisely, the strategy of the Sub-Fund is based on:

- *Investment Manager's capacity in identifying the securities that can potentially outperform their market index. To reach this objective, the Investment Manager buys equities that could outperform and sells at the same time a future contract on market index. The performance will come from the difference of performance between the equity bought and the index sold.*
- *Investment Manager's capacity in identifying the securities that can potentially outperform their sector index, or another related sector. To reach this objective, the Investment Manager buys equities that could outperform their sector of activity or a related sector and sells at the same time a future contract on the sector index (even ETF). The performance will come from the difference of performance between the equity bought and the future contract on sector index or related one sold."*

In addition, the Sub-Fund's investment policy will be amended as follows:

"The Sub-Fund may at any time invest in:

- Equities issued in Europe (EEA plus Switzerland) or equivalent financial instruments (such as ETF, futures, CFD and/or DPS, etc.): from 0 to 100% of its net assets,*
- Equities issued out of EEA plus Switzerland: up to 5% of its net assets*
- Equities with total market capitalisation below 150 million Euros: up to 5% of its net assets,*
- Euro zone Ordinary Bonds, convertibles bonds or equivalent: from 0% to 100% of its net assets,*
- Money market instruments or deposits, from 0 to 100% of its net assets,*
- In other financial instruments: up to 10% of its net assets."*

[...]

For the purpose of hedging or increasing equity or currency risk without seeking overexposure, the Sub-Fund also operates on regulated markets of futures on European indexes and future on sectors (included or not in a DPS), as well as in UCITS, including UCITS qualifying as ETFs."

(xiii) DNCA INVEST – EUROPE GROWTH

From July 27th, 2015, the Sub-Fund's investment policy will further be amended to clarify that:

"The management process is based solely on fundamental financial analysis. This consists in identifying companies able to meet the 8 following selection criteria:

- A future organic growth superior to 5% per year,*
- High barriers to entry (technology, brand, know-how, assets, regulation, etc.) that could discourage potential new competitors,*
- An attractive valuation*
- Profitability improvement*
- Abundant cash flow*
- Strong balance sheet*
- Value creation*
- Quality management team"*
