LUX_S_EN

Dear Shareholder,

We are writing to you as a Shareholder of the Invesco Funds due to several amendments, as further described below, to be included in the Prospectus dated 12 November 2020 (the "Effective Date") unless otherwise stated below.

If any of the below mentioned amendments do not suit your investment requirements, you are advised that you may, at any time redeem your shares in the Funds without any redemption charges. Redemptions will be carried out in accordance with the terms of the Prospectus.

Unless otherwise stated below, all costs associated with the proposed below changes will be borne by the Management Company.

A. Changes to the Invesco Renminbi Fixed Income Fund

It is proposed to proceed with various changes to the Invesco Renminbi Fixed Income Fund as of the Effective Date as further described below.

A.1 Change of the investment objective and policy and update to the risks applicable

The Directors have decided to reposition the Invesco Renminbi Fixed Income Fund from a Renminbi-focused bond strategy to an Asian investment grade bond strategy.

Renminbi-focused active strategies have not been able to collect significant assets over the last five years, in a context of a small sector with limited and stagnating number of products and with an increasing number of passive solutions. Hence, the Directors believe that those active strategies are unlikely to gather meaningful assets into the future and meaningful economies of scale are unlikely to materialize.

On the other hand, Asian-investment-grade-focused strategies have been able to attract significant assets over the years and the Directors believe they will continue to do so, as the fixed income sector in the region further opens-up and diversifies. Therefore, it is believed that the repositioned strategy should benefit from a bigger assets pool and potential economy of scale, in a context of a broader investment universe and better long-term risk-adjusted potential.

The investment objective and policy of the Invesco Renminbi Fixed Income Fund will be amended as further described below:

Current Investment objective and policy	New investment objective and policy as of the Effective Date
The investment objective of the Fund is to achieve total return, comprised of current income and capital appreciation by investing primarily in Renminbi (RMB) denominated debt instruments and RMB denominated Money Market Instruments and bank deposits. The term "Renminbi (RMB)" used herein refers to both offshore RMB ("CNH") traded in Hong Kong and to onshore RMB ("CNY") traded in Mainland China. The Fund will invest in a flexible allocation of (i) RMB denominated debt instruments of governments, supranational bodies, local authorities, national public bodies and corporate issuers worldwide, (ii) RMB denominated Money Market Instruments and (iii) RMB denominated bank deposits including certificates of deposits. The investment in instruments denominated	The Fund aims to generate income, together with long term capital growth. The Fund seeks to achieve its objective by investing primarily in investment grade (or deemed to be equivalent by the Investment Manager) Asian debt securities. Asian debt securities shall include debt issued or guaranteed by Asian governments, local authorities/public authorities or corporate issues denominated in hard currencies (i.e. globally traded major currencies). Asian corporate issuers shall be understood to mean issuers or guarantors which (i) have their registered offices or headquarters located in

in RMB (CNY) and traded in Mainland China (including but not limited to the CIBM) will be achieved through Bond Connect. The proportion invested in debt instruments and Money Market Instruments will vary as circumstances dictate. Up to 30% of the NAV of the Fund may be invested in aggregate in non-RMB denominated investments including Money Market Instruments or debt securities (including convertible debt). Non-RMB investments are intended to be hedged back into RMB at the discretion of the Investment Manager. The Fund will also be invested in cash and cash equivalents. Depending on market conditions, the Fund may allocate up to 100% of NAV to instruments denominated in onshore RMB through Bond Connect. The Fund may invest up to 20% of its NAV in contingent convertibles.	an Asian country or (ii) carry out their business activities predominantly (50% or more by revenue, profit, asset or production) in Asia. Up to 30% of the NAV of the Fund may be invested in cash, cash equivalents, Money Market Instruments and other debt securities not meeting the above requirements. The Fund may access China onshore bonds in the CIBM via Bond Connect for less than 20% of its NAV. The Fund will not invest more than 10% of its NAV in high yield debt securities. The Fund may invest up to 20% of its NAV in contingent convertibles. The Fund will not hold debt securities with a credit rating of below B- by Standard and Poor's rating agency, or equivalent (or in the case of unrated debt securities, determined to be of an equivalent rating). Furthermore, the Fund will not hold securitised debt securities, such as ABS, rated below investment grade. The Fund's use of derivatives may include derivatives on credit, rates and currencies and may be used to achieve both long and short positions. The Fund may also use derivatives on equities, where the Investment Manager believes that such investment could reduce drawdowns. For the purposes of the Fund, Asian countries have been defined as all countries in Asia excluding Japan but including Australia and New Zealand. Non-USD denominated Investments may be hedged back into USD at the discretion of the Investment Manager.
--	--

As a result of the above changes, the "holding concentration risk", the "sector concentration risk", the "High Yield Bond/Non-Investment Grade Bond risk" and the "portfolio turnover risk" will no longer be considered as relevant risks to the Invesco Renminbi Fixed Income Fund post-repositioning. The risk matrix disclosed in Section 8 (Risks Warnings) of the Prospectus will be updated accordingly as of the Effective Date.

A2. Change of name of the Invesco Renminbi Fixed Income Fund

From the Effective Date, please note that the Invesco Renminbi Fixed Income Fund will be renamed the **Invesco Asian Investment Grade Bond Fund** in order to reflect the updated investment objective and policy.

A3. Change of the method of calculation of the global exposure and update to the expected level of leverage

From the Effective Date, the methodology used to calculate the global exposure will be amended from absolute Value at Risk (VaR) to relative VaR approach. In light of the changes, the following composite indexes 80% JP Morgan JACI Investment Grade Index and 20% Bloomberg Barclays China Treasury and Policy Bank Total Return Index have been identified as a suitable proxy to the updated investment objective and policy of the Invesco Renminbi Fixed Income Fund.

In addition, the expected level of leverage which is calculated using the sum of notional of all financial derivatives Instruments will be updated from 50% to 40%.

A4. Reduction of the management fee

From the Effective Date, the management fee of the Invesco Renminbi Fixed Income Fund will be reduced as follows.

Share class	Existing Management Fee	New Management Fee
A	1.00%	0.90%
B	1.00%	0.90%
C	0.60%	0.60%
E	1.25%	1.20%
J	1.00%	0.90%
P/ PI	0.50%	0.45%
R	1.00%	0.90%
S	0.50%	0.45%
T	0.50%	0.45%
Z	0.50%	0.45%

For the avoidance of doubt, there is no change to the management fee in respect of "C" Share classes and "I" Share classes ("I" Share classes do not bear any management fee).

The estimated costs associated with any rebalancing of the underlying investments of the portfolio are not expected to exceed 60 bps. These costs will be borne by the Invesco Renminbi Fixed Income Fund, as it is believed that the repositioning aims to provide investors with a fund with improved risk-adjusted profile, improved pricing and higher opportunities to grow over the long term, thus benefitting from economies of scale.

Do any of the above amendments not suit your investment requirements?

In addition to the ability to redeem free of charge as disclosed above, you may also avail of a switch out of the Invesco Renminbi Fixed Income Fund, provided such requests are received at any time prior to the Effective Date, into another Fund in the SICAV (subject to minimum investment amounts as set out in the Prospectus and authorisation of the particular Fund for sale in your relevant jurisdiction). The switch will be carried out in accordance with the terms of the Prospectus, but no switching fee will be imposed on any such switch. Before taking any decision to invest in another Fund, you must first refer to the Prospectus and the risks involved in relation to the same.

B. Changes to the Invesco Korean Equity Fund

It is proposed to proceed with various changes to the Invesco Korean Equity Fund as of 10 December 2020 as further described below.

B.1 Change of the investment objective and policy and update to the risks applicable

The Directors have decided to reposition the Invesco Korean Equity Fund from a concentrated Korean equity strategy to an emerging markets equity strategy with a high-conviction and fundamental approach within a concentrated portfolio.

As the assets under management of the Invesco Korean Equity Fund have reduced over the last number of years and the Invesco Korean Equity Fund is facing performance challenges, it is believed that the proposed repositioning will provide the opportunity for better risk-adjusted returns over the long term to Shareholders while investing in a sector with greater opportunity.

The investment objective and policy of the Invesco Korean Equity Fund will be amended as further described below:

Current Investment objective and policy	New investment objective and policy as of 10 December 2020
The Fund aims to achieve long-term capital growth. The Fund seeks to achieve its objective by investing primarily in equity or equity related securities (i) listed or traded on the Korean securities markets, (ii) of companies and other entities with their registered office in Korea, (iii) of companies and other entities with their registered office outside of Korea but carrying out their business activities predominantly in Korea, (iv) of holding companies, the interests of which are predominantly invested in companies with their registered office in Korea, or (v) of subsidiaries of Korean companies. Up to 30% of the NAV of the Fund may be invested in cash and cash equivalents, Money Market Instruments, equity and equity related securities and debt securities (including convertible debt) issued by companies and other entities not meeting the above requirements. No more than 10% of the NAV of the Fund may be invested in warrants.	The Fund aims to achieve long-term capital growth. The Fund seeks to achieve its objective by investing primarily in equity or equity related securities of (i) companies with their registered office in an emerging market country, (ii) companies with their registered office in a non-emerging market country but carrying out their business activities predominantly in emerging market countries or (iii) holding companies, the interests of which are predominantly invested in companies with their registered office in emerging market countries. Stock selection is fundamentally driven, bottom-up, and emphasizes three factors: high-quality businesses, strong management and an attractive price. Up to 30% of the NAV of the Fund may be exposed to China A shares listed on the Shanghai or Shenzhen Stock Exchanges, via Stock Connect. Up to 30% of the NAV of the Fund may be invested in cash, cash equivalents, Money Market Instruments, convertible debt and other Transferable Securities not meeting the above requirements.

As a result of the above changes, the "stock connect risk" will be added as part of the relevant risks applicable and the "country concentration risk" will no longer be considered as relevant risks to the Invesco Korean Equity Fund post-repositioning. The risk matrix disclosed in Section 8 (Risks Warnings) of the Prospectus will be updated accordingly as of 10 December 2020.

B2. Change of name of the Invesco Korean Equity Fund

From 10 December 2020, please note that the Invesco Korean Equity Fund will be renamed the **Invesco Emerging Markets Select Equity Fund** in order to reflect the updated investment objective and policy.

B3. Change of the benchmark to calculate the global exposure

From 10 December 2020, in light of the updated investment objective and strategy, the benchmark used to calculate the global exposure of the Invesco Korean Equity Fund will change from Korea Composite Stock Price Index (KOSPI) to MSCI Emerging Markets Index.

B4. Reduction of the management fee

From 10 December 2020, the management fee of the Invesco Korean Equity Fund will be reduced as follows.

Share class	Existing Management Fee	New Management Fee
A	2.00%	1.50%
B	2.00%	1.50%
C	1.50%	1.00%
E	2.50%	2.25%
J	2.00%	1.50%
P/ PI	1.00%	0.75%
R	2.00%	1.50%

S	1.00%	0.75%
T	1.00%	0.75%
Z	1.00%	0.75%

For the avoidance of doubt, there is no change to the management fee in respect of "I" Share classes, as they do not bear any management fee.

The estimated costs associated with any rebalancing of the underlying investments of the portfolio are not expected to exceed 60 bps. These costs will be borne by the Invesco Korean Equity Fund, as it is believed that the repositioning aims to provide investors with a fund with improved risk-adjusted profile, significantly improved pricing and higher opportunities to grow over the long term, thus benefitting from economies of scale.

Do any of the above amendments not suit your investment requirements?

In addition to the ability to redeem free of charge as disclosed above, you may also avail of a switch out of the Invesco Korean Equity Fund, provided such requests are received at any time prior to 10 December 2020, into another Fund in the SICAV (subject to minimum investment amounts as set out in the Prospectus and authorisation of the particular Fund for sale in your relevant jurisdiction). The switch will be carried out in accordance with the terms of the Prospectus, but no switching fee will be imposed on any such switch. Before taking any decision to invest in another Fund, you must first refer to the Prospectus and the risks involved in relation to the same.

C. Changes to the Invesco US Equity Flexible Fund

It is proposed to proceed with various changes to the Invesco US Equity Flexible Fund as of the Effective Date as further described below.

C1. Change of the investment objective and policy and update to the risks applicable

The Directors have decided to reposition the Invesco US Equity Flexible Fund from a flexible allocation to US large cap equities to a diversified global equities strategy focused on innovative themes and companies.

As the Invesco US Equity Flexible Fund has not generated any meaningful assets and is facing performance challenges, the Directors believe that the proposed repositioning is better equipped to achieve its objective and has better opportunity to grow over the medium to long term.

The re-positioned Invesco US Equity Flexible Fund will continue to target long term capital growth, benefiting from a new quantitative investment methodology, a more diversified investment universe and in the context of thematic investments. It is believed this should enhance the long-term risk-return profile and growth opportunities of the Invesco US Equity Flexible Fund.

The costs associated with any rebalancing of the underlying investments of the portfolio are not expected to be material and will be borne by the Invesco US Equity Flexible Fund. The investment objective and policy of the Invesco US Equity Flexible Fund will be amended as further described below:

Current Investment objective and policy	New investment objective and policy as of the Effective Date
The Fund aims to achieve long-term capital growth while managing downside risk relative to traditional US Equity indices.	The Fund aims to achieve long-term capital growth integrating a thematic approach.
The Fund seeks to achieve its objective by investing primarily in equities of (i) companies and other entities with their registered office in the US or incorporated or	The Fund seeks to achieve its objective by investing primarily in equity and equity related securities of companies globally, including emerging markets, which meet the Fund's thematic selection criteria, with a

organised in the US, or (ii) companies and other entities with their registered office outside of the US but carrying out their business activities predominantly in the US or (iii) holding companies, the interests of which are predominantly invested in companies with their registered office in the US or in companies incorporated or organised in the US. While the Fund will be invested primarily in US equities, the actual equity exposure can be flexible. The Investment Manager will, mainly through the use of derivatives, adjust the equity exposure of the Fund on a continuous basis in response to market conditions. At times, the Fund may be positioned defensively and the exposure to equities may be reduced to 50% of its NAV. Up to 30% of the NAV of the Fund may be invested in cash, cash equivalents, Money Market Instruments and other Transferable Securities not meeting the above requirements. The stock selection follows a highly structured and clearly defined investment process. Quantitative indicators that are available for each stock in the investment universe are analysed and used by the Investment Manager to evaluate the relative attractiveness of each stock. The portfolio is constructed using an optimisation process that takes into account the calculated expected returns of each stock as well as risk control parameters. The Fund's use of financial derivative instruments may include but is not limited to futures, options and forwards. The overall volatility of the Fund is intended to be lower than that of a long only portfolio invested in US equities, over a market cycle, however, this may not be achieved, and the Fund can experience high volatility.	focus on innovation across a broad range of themes addressing mega trends linked to demographic, technology and environmental changes. The stock selection follows a highly structured and clearly defined investment process. A universe of key themes addressing innovation related to mega trends is identified using Natural Language Processing (NLP) algorithms on multiple data sources. Within each theme, companies are then identified and selected on the basis of their relevance on defined news universes. NLP algorithms and other quantitative indicators will be used to screen companies. The portfolio is constructed using a weighting process that considers the relevance of each selected stock within each identified single theme, which will result in a broadly diversified portfolio exposed to multiple themes. Up to 10% of the NAV of the Fund may be exposed to China A shares listed on the Shanghai or Shenzhen Stock Exchanges, via Stock Connect. The Fund may also hold up to 30% of its NAV in cash and cash equivalents, Money Market Instruments and other Transferable Securities.
---	--

As a result of the above changes, the "currency exchange risk" and the "Stock Connect risks" will be added as part of the relevant risks applicable to the Invesco US Equity Flexible Fund post-repositioning. The risk matrix disclosed in Section 8 (Risks Warnings) of the Prospectus will be updated accordingly as of the Effective Date.

C2. Change of name of the Invesco US Equity Flexible Fund

From the Effective Date, please note that the Invesco US Equity Flexible Fund will be renamed the **Invesco Global Thematic Innovation Equity Fund** in order to reflect the updated investment objective and policy.

C3. Change of the benchmark to calculate the global exposure

From the Effective Date, in light of the updated investment objective and strategy, the benchmark used to calculate the global exposure of the Invesco US Equity Flexible Fund will change from 75% S&P 500, 25% J.P. Morgan 3 Month Cash Index to MSCI ACWI Index.

In addition, the expected level of leverage which is calculated using the sum of notional of all financial derivatives instruments will be updated from 25% to 10%.

C4. Change of Investment Manager

From the Effective Date, the Investment Manager will become Invesco Asset Management Deutschland GmbH (to replace Invesco Advisers, Inc.). Invesco Asset Management Deutschland GmbH has a strong expertise on quantitative strategies.

C5. Change of the profile of Typical investor

From the Effective Date, the repositioned Invesco US Equity Flexible Fund will appeal to investors seeking return over the long term and willing to accept high volatility (whereas the existing Invesco US Equity Flexible Fund may appeal to investors seeking a return over the medium to long term and willing to accept moderate to high volatility).

Do any of the above amendments not suit your investment requirements?

In addition to the ability to redeem free of charge as disclosed above, you may also avail of a switch out of the Invesco US Equity Flexible Fund, provided such requests are received at any time prior to the Effective Date, into another Fund in the SICAV (subject to minimum investment amounts as set out in the Prospectus and authorisation of the particular Fund for sale in your relevant jurisdiction). The switch will be carried out in accordance with the terms of the Prospectus, but no switching fee will be imposed on any such switch. Before taking any decision to invest in another Fund, you must first refer to the Prospectus and the risks involved in relation to the same.

D. Change of the investment objective and policy, change of name of the Invesco Global Targeted Returns Select II Fund and increase of the management fee of the "S" Shares

From the Effective Date, it is proposed to change the investment objective and strategy of the Invesco Global Targeted Returns Select II Fund to a higher volatility version of the current strategy. The investment objective will change as follows:

"The Fund aims to achieve a positive total return in all market conditions over a rolling 3 year period. The Fund targets a gross return of 7.5% p.a. above 3 month Bank Bill Swap Rate (or an equivalent reference rate) and aims to achieve this with less than 75% of the volatility of global equities, over the same rolling 3 year period. There is no guarantee that the Fund will achieve a positive return or its volatility target. The Fund seeks to achieve its objective by combining a number of individual investment ideas in a risk-managed portfolio."

Due to the higher volatility targeted, the expected level of leverage, which is calculated using the sum of notional of all financial derivatives instruments will increase from 900% to 1250%.

In addition, please note that the Invesco Global Targeted Returns Select II Fund will be renamed the **Invesco Global Targeted Returns Plus Fund** in order to better reflect the updated objective of the Fund.

All costs incurred in connection with the proposed changes will be borne by the Management Company. The costs associated with any rebalancing of the underlying investments of the portfolio will be borne by the Invesco Global Targeted Returns Select II Fund, which are not expected to be material.

In addition, from the Effective Date the management fee of the existing "S" Share class will increase from 0.70% to 1.05% taking into account the increased return target. For the avoidance of doubt, there will be no change to the management fee in respect of the existing "I" Share class as "I" Shares do not bear any management fee.

E. Change of the investment objective and policy of the Invesco Gold & Precious Metals Fund

From the Effective Date, the investment objective and policy of the Invesco Gold & Precious Metals Fund will change to allow the use derivative instruments for investment purposes. Such investment will however be restricted to 40% of the NAV of the Invesco Gold & Precious Metals Fund, as measured by the commitment approach.

In light of the above change, the "Financial derivative instruments for investment purposes risk" will be added as a relevant risk applicable to the Invesco Gold & Precious Metals Fund. The risk matrix disclosed in Section 8 (Risks Warnings) of the Prospectus will be updated accordingly as of the Effective Date.

Finally, please note that the Invesco Gold & Precious Metals Fund will be renamed the **Invesco Gold & Special Minerals Fund** as of the Effective Date to be more in line with the global Invesco flagship fund in the US.

F. Change of the investment objective and policy of the Invesco Asian Flexible Bond Fund

From the Effective Date, the investment objective and policy of the Invesco Asian Flexible Bond Fund will change to allow the use derivative instruments for investment purposes. Such investment will however be restricted to 40% of the NAV of the Invesco Asian Flexible Bond Fund, as measured by the commitment approach.

In light of the above change, the "Financial derivative instruments for investment purposes risk" will be added as a relevant risk applicable to the Invesco Asian Flexible Bond Fund. The risk matrix disclosed in Section 8 (Risks Warnings) of the Prospectus will be updated accordingly as of the Effective Date.

G. Clarification of the investment objective and policy of the Invesco Global Moderate Allocation Fund

From the Effective Date, the investment objective and policy of the Invesco Global Moderate Allocation Fund will be clarified to comply with the Versicherungsaufsichtsgesetz (VAG) requirements in Germany. To this end, it will be clarified that the Invesco Global Moderate Allocation Fund will not hold debt securities with a credit rating of below B- by Standard and Poor's rating agency, or equivalent (or in the case of unrated debt securities, determined to be of an equivalent rating). Furthermore, the Invesco Global Moderate Allocation Fund will not hold securitised debt securities, such as ABS, rated below investment grade.

The above clarification will not change the way the Invesco Global Moderate Allocation Fund is managed nor will it result in any change to the risk profile of the Invesco Global Moderate Allocation Fund.

H. Clarification of the investment objective and policy of the Invesco Pan European Structured Responsible Equity Fund and the Invesco Sustainable Allocation Fund (hereafter "the Funds")

From the Effective Date, the investment objective and strategy of the Funds will be clarified in order to enhance disclosures in respect to certain key items, such as the environmental and social characteristics/sustainable criteria forming part of the investment strategy of the Funds.

In relation to the Invesco Pan European Structured Responsible Equity Fund, it will be clarified that the Investment Manager will use screening to identify issuers with sufficient practice and standards in terms of energy transition for inclusion in the Invesco Pan European Structured Responsible Equity Fund's universe, as measured by their ratings relative to their peers. As a result of these ESG guidelines for screening, it is expected that the size of the investment universe of the Invesco Pan European Structured Responsible Equity Fund will be reduced by about 30% to 40% in terms of number of issuers.

In relation to the Invesco Sustainable Allocation Fund, it will be clarified that, as a result of the ESG guidelines of the Invesco Sustainable Allocation Fund for screening, it is expected that the size of the investment universe of the Invesco Sustainable Allocation Fund will be reduced by about half in terms of number of issuers.

In addition, more information on the Funds' ESG policy will be available on the Website of the Management Company.

The above clarification will not change the way the Funds are managed nor will it result in any change to the risk profile of the Funds.

I. Availability of documents and additional information

For the list of Share classes available in each Fund, please refer to the Website of the Management Company (<http://invescomanagementcompany.lu>).

Do you require additional information?

The updated Prospectus, its Appendix A and the updated Key Investor Information Documents will be available free of charge at the registered office of the SICAV. These will also be available from the Website of the Management Company of the SICAV (Invesco Management S.A.) as of the Effective Date.

Do you have any queries in relation to the above? Or would you like information on other products in the Invesco range of funds that are authorised for sale in your jurisdiction? Please contact your local Invesco office.
